

Fight the Funding Cuts!

Save **O**ur **S**ystem **2010**

Your Waterways are in Danger!

www.SOS2010.org.uk

Dear Resident,

Your waterways are in danger!

If you use the towpath, or live near to a canal or river this issue affects you!

The amount of money Government gives to its agencies to look after the canals and rivers of our country has been slashed.

Underfunding will inevitably lead to deterioration in maintenance standards, which are already poor, affecting safety, and may lead to closure and dereliction of towpaths and lengths of waterway - affecting nearby homes and property values.

We must all defend our waterways system before it is too late.

We need your support.

Please write to your MP or local councillor explaining your concerns over the proposed cuts in waterways funding and how these might affect your use and enjoyment of the waterways near you and of your concerns about their affect on local property prices if you live on or near a waterway.
